#### **Report by the President**

In compliance with statutory obligations, we are pleased to submit to Stockholders the Results of Bank Operations during second half-year 2010 operational period.

#### **Legal Standards**

Among provisions and regulations issued during the second half-year 2002, directly impacting financial sector, the following shall be underlined:

#### Compensation scheme for tax collection

Resolution No. 2166 of July 30, 2010 by the Ministry of Treasury and Public Credit: whereby paragraph in Article 2, Resolution 0008, 2000, is amended gradually reducing compensation of the number of days for collecting entities, as follows:

- 1. As from September 1, 2010, an initial reduction of the Index by 12 days and until 6 variables.
- 2. As from March 1, 2011, the index will be 9 days, with 4 fixed and up to 5 variables.
- 3. As from September 1. 2011 the index will be 7 days, with 3 fixed and up to 4 variables.
- 4. As from March 1, 2012 the index will be 5 days, with 2 fixed and up to 3 variables.

#### Habeas Data

Decree No. 2952 of August 06, 2010 by Colombia Ministry of Treasury and Public Credit: Includes explanations about especial requirements of sources of information and aspects related to conservation of data. For such reason, it is possible to give to kidnapping victims, forced disappearance individuals, a different treatment in the administration of their financial, credit and commercial information. Negative information in the event of delay less than 2 years, the term of conservation will not exceed twice the delay. For the other events, conservation term will be four (4) years as from the date the delay expiry for any reason.

#### Exchange Correspondent

**Decree No. 3594, September 29, 2010 by the Ministry of Treasury and Public Credit:** Whereby the Decree 2555/2010 is amended and article 100 in Act 1328/2009 is regulated, indicating the scope of the operations authorized to Exchange Correspondent, and some operative, requisites, obligations aspects are regulated, allowing for delimiting the conditions to exercise Exchange correspondent activity and the supply of financial services that exchange market intermediaries can develop through the correspondents.

#### Patrimony Tax

**Decree No. 4825 of December 29 de 2010 by Ministry of Treasury and Public Credit:** Whereby provisions about real estate tax are issued in the context of economic, social and ecological emergency declared under Decree 4580/2010, as follows:

- For taxpayers with net patrimony between one thousand and two thousand million pesos, the rate will be one percent (1%).
- Between two thousand and three thousand million pesos, the rate will be 1.4%.
- Between three thousand and five thousand million pesos, currently taxpayers, an overcharge of 25% over the current rate, (2.4%).
- For patrimonies more than five thousand million pesos, the overcharge will be as well 25% over the current rate 4.8%.

#### Tax Reform

Act No. 1430 of December 29, 2010 by Colombian Congress: Whereby tax and competitiveness control provisions are issued, of which the following are summarized:

- The especial reduction for investment in real productive asset is eliminated, which was 30%
- The tax to Financial Transactions is gradually eliminated with 2‰ in 2014 and 2015, 1‰ in 2016 and 2017, and from 2018 on

- As from 2013, 50% of Financial Transaction Tax (FTT) actually paid will be deductible irrespective of causality relationship to the income-generating activity.
- Activity generating FTT is extended to include, among others, an ample group of payment management
  operations in the Exchange Market, credit facilities, or used to pay third parties, agents or deputies, for
  collection and/or payment of such concepts as payroll, services, suppliers, acquisition of property or any
  compliance of obligations.
- Some limitations to FTT exemptions are provided, among others:
  - Disbursement of credits to credit establishments, if disbursement is made to a third party; only there is exemption when debtor uses the credit to purchase housing, vehicle, or fixed asset.
  - Disbursements or payments for such concepts as payroll, services, suppliers, purchase of goods or comply
    with any obligations, are subject FTT, safe for the use of natural persons debit card.
  - Disbursements made by financing companies or banks to pay the marketers of goods to be delivered to third parties as financial leasing with call option are considered as exempt.
  - The exemption to cover withdrawal of prepaid cards opened or managed by financial entities, is extended. In the same way the benefit to transfers made between savings account and prepaid cards opened in the same credit entity are extended.
- For cost, deduction, liabilities and discountable tax acceptance purposes, the payments made by taxpayers
  or responsible shall be made by any of the means involving the use of financial system in the form and
  conditions authorized by National Government
- Amnesty is given for VAT and Withholding at Source non-submitted Declarations, according to conditions
  defined.
- ICA taxable base is extended to financial sector, including in the taxable base the account of sundry revenues.
- The profit from derivatives negotiation which are securities and which subjacent is represented in stocks registered in any Colombian stock exchange, indexes or participations in funds or collective portfolios reflecting the behavior of such stocks, are considered revenues constitutive of income.

#### **Bank's Results**

In the world Economy the implementation by Developed countries of measures aimed at lessening the effects of financial crisis started in the United Status, has been observed in 2010, featured by issuing expansionist policies with low interest rates and controls of the Exchange rate by the so-called "War of Foreign Currency". Colombia has not been the exception, with strong pressures of peso revaluation which have been partially controlled by official measures promoting the payment of public debt in USD and reforms to tariff regime thus reducing the mean rate from 12% down to 8%.

In the first half-year, a deceleration of Colombian economy recovery occurred as against the significant recovery since the end 2009, when GDP growth trend was 4.4% annually, to close the third quarter of the year with 3.6% annually, fueled by the growth of households and government consumption. It is expected that the last quarter of year, the trend will be recovered by the demand dynamics observed, with significant increments in the third quarter 2010 in gross capital formation (6.8%) and households consumption (4.3%). Notwithstanding, for the first quarter 2011, such dynamics will be curbed by winter disasters, resulting in the loss of harvests, and mobility restriction due to the landslides, in the major ways of the country, and taxation measures such as FTT which increases credit cost.

This behavior of Colombian economy has allowed for the enhancement of employment conditions, and therefore, unemployment rate on November 2010 was 10.8%, 0.3 point lower than the rate observed in the precedent year; most of the new jobs generated, however, is informal employment as a result, inter alia, of the high parafiscal contributions.

Inflation 3.17% annually recorded at the end December 2010, remained within the goal set forth, in spite "niño" phenomenon unfavorable effects on foodstuff production

On the other hand, the market representative rate went from Col\$1,916.46 on June 2010 up to 0.13% revaluation

The second half-year 2009, featured by an increment of availability of liquid funds with financial system transactions. Above situation was reflected on the dynamics of portfolio placements, given by the positive behavior of household consumption and capital gross formation, which captured the stimuli of low interest rate and government allowances. On November 2010, total gross portfolio showed 16.44% increase in annual nominal terms, mortgage modality being of the higher dynamics pushed up by government subsides of the interest rates. In the same way, it is necessary to highlight 16.44% commercial portfolio recovery and 14.7% increased consumption

From the economic sector growth standpoint, financial sector increased 3.3%, which means that the sector recorded 3.3% accrued profit level as of November 2010, and 0.56% annual growth. In the former records the behavior of asset returns has had high incidence, showing 15.09% increase fueled by gross portfolio which has seen reduced both the rates and investments, reporting high expenses for negative valuations in the first quarter 2010.

Concerning interest rates, it was observed a stable behavior, marked by Central Bank rate intervention, the last reduction 50 pb on April 2010 reaching 3%, such condition clearly reflected in the tendency recorded in reference rate DTF, which on June 2010 was around 3.50% EA recorded on December 2010. On the other hand, usury rate of consumption and ordinary portfolio, on April-June 2010 reached 29.97% EA, reaching 21.32% EA for period October-December 2010. Interbank rate maintained its level on June 30, 2009, 3.03% EA as against 2.9/ EA recorded at the end December 2010. This situation implied a generalized drop of margins in financial system, where profitability indicator on patrimony of credit entities has dropped 2 point percent, growing from 17.0% on November, down to 15.9% on November 2010.

Bank system as a whole showed a positive increase on November 2010. The growth of deposit of credit establishments was 9.88%, while credit portfolio evaluation showed 22.5% annual increase where the major growths occurred in the mortgage and commercial portfolio. Banking system reported accrued profits at the closing November 2010 for \$4.414MMM and 6.42% annual growth

Within above environment, Banco de Occidente reported the following results:

Total Asset increased by \$442,962MM in respect of the first-half-year 2.010, representing 2.59 growth reached at the closing December 2010, total \$17.561.402MM, in annual terms the asset increased by \$3.426.212MM compared to December 2.009 equivalent to 24.24% growth.

Legal Tender and Foreign Currency Credit Portfolio increase by \$3.425.735MM compared to December 2.009, representing 40.80% annual increase. Placements in Legal Tender represent 39.60% annual increase

Credit Portfolio qualified C, D, and E. showed \$559.881MM representing 4.74% of the total credit portfolio. At the level of Bank System at the closing November 2010, reached 4.31%.

The Balance of Provisions to protect asset, at the closing December 31, 2010. Adds up \$535.254MM total with 14-82% annual growth. At the closing of this operational period the coverage for portfolio provision related to the amount of credits qualified in C, D, and E is 95.69% compared to system coverage at the closing November 2010, reaching 151.02%.

Total investment reached the amount of \$4.077.144MM, decreasing by 3.74% compared to December 2009 and 1,81% respect of the first half-tear 2010.

Total Deposits behavior at the closing December 31, 2.010 reached \$10.972.344MM which means \$282.214MM growth compared to the first half-year 2.010 and \$542.552MM compared to the precedent year, which represents 5.20% annual percent growth and 2.64% half-year growth. Upon the analysis of Deposits composition it is evidenced that this growth is explained mainly by Current Account increase, which as of December 31 reaches \$4.970.270MM growing \$923.567MM in respect of the same period of the precedent year, which represents 22.82% annual percent growth

The balance at the closing December 31, 2.010 from issue of Ordinary and Subordinate bonds is \$1.421.077MM.

Invoicing of Credencial Credit Card Operations reached \$859.479MM in the second half-year 2010, growing by \$59.279MM compared to the same period in 2009, which is equivalent to 7.4% annual percent growth. The number of cards placed into the market as of December 31, 2010 is 394.007 cards, an increase of 19.494 cards compared to December 2009, which represents 5.21% growth

Bank's Total Net Worth amounted to \$2.592.622MM, growing by \$651.949MM compared to December 2.009 and by \$268.106MM compared to the closing of the first-half-year 2010 representing 33.59% annual growth and 11.53% compared to the first half-year 2.010.

At the closing December 31, 2.010 the profit was \$202,020MM higher by 13.59% than the profit obtained at the closing December, 2.009 and 7.77% compared to the closing of the operational period on June 30/2010.

Annual profit of total Asset is 2.30% and Patrimony 15.58% compared to 2.52% and 18.33% respectively as of December 2.009. Such Indexes show levels comparable to those recorded by Bank System at the closing November 2.010, the last date available of Colombia Finance Superintendence (period July - November 2010 annual) recording Total Asset Profitability 1.92% and Patrimony 14.51%.

#### **Tax and Legal Contributions**

Total Tax and Legal Contributions at the closing of second half-year 2010 reached an accumulate increase of \$119.577MM, representing 28.6% annual growth and 28.6% semi-annual growth. Effective rate of Income and Complementary tax, indirect tax and legal contributions increased compared to that prevailing at the closing June 30 2.010, goes from 33.2% up to 37.2%. The table below the itemization of these figures is shown:

| Figures ( n Million COL\$) |  | II Half-Year<br>2010 | I Half-Year<br>2010 | Variance (\$) | Variance<br>(%) |
|----------------------------|--|----------------------|---------------------|---------------|-----------------|
| Α.                         | Income and Complementary Tax             | 71.248               | 47.183              | 24.065        | 51.0%           |
| В.                         | Patrimony Tax 2009                       | 3.137                | 7.891               | -4.754        | -60.3%          |
| C.                         | Excise Tax                               | 16.561               | 18.120              | -1559         | -8.6%           |
|                            | VAT                                      | 10.320               | 10.590              | -270          | -2.5%           |
|                            | Industry and commerce Tax                | 5.003                | 6.301               | -1.298        | -20.6%          |

Note: Figures in Million Pesos

#### **Operations with Stockholders and Directors**

As of de December 31, 2010 the Bank had loans for \$91.533,9MM with admissible guarantee, and \$56.172,4MM with other guarantees granted to its stockholders under market conditions. At the same closing date, there were loans granted to Directors for \$41.692,7MM, supported basically on credit card operations and credit operations to purchase house and vehicle, according to conditions stipulated by the Bank to its employees. At the closing date there exist no credits granted to stockholders holding in the Bank any stock participation higher than 10%.

#### **Bank Foreseeable Evolution**

Considering the results of Financial System as a whole during the last year, it is anticipated that the Bank will maintain profitability indicators and financial efficiency favorable comparable to the system average, as historically has occurred.

#### **Alter Closing Operational Period**

As provided in article 47 of Act 222/1995, it is indicated that there has been no any significant external or internal occurrence potentially affecting the normal operations development and the results of the Bank, from the closing of the last operational period until the date of this report.

#### **Qualification of Risk**

At the closing of this operational period, Banco de Occidente maintains, for the thirteenth consecutive year AAA qualification, the highest credit quality for long-term debt, and BRC1+, the highest certainty of payment for short-term debt by BRC Investor Ranking Society.

#### **Disclosing of Financial Information**

In compliance with the provisions in article 47 of Act 964/2005 related to financial information disclosing and control, Banco de Occidente has in place the internal control components ensuring the completeness of financial information and disclosures required.

For such purposes, in addition to the group of legal regulations and supervision, Banco de Occidente has in possession internal documentation including the policies and standards, procedures and controls of mandatory compliance by the entity's employees, in order to ensure financial information quality and integrity.

Additionally, General Comptroller Office, as the internal control body, includes in the work plan the evaluation of control structure of the entire organization and the result of this activity is submitted to the Audit Committee of the Board of Directors, who, in turn, conducts the appropriate evaluation and includes this aspect in the Report to the Board of Directors, who, subsequently is make available to the Stockholders General Meeting consideration

On the other hand, External Auditing, in charge of KMPG Ltda. a well-known accounting firm at international level, accomplishes its duties, among other, the audit, in an independent manner, financial statements and issues an opinion about the information disclosed in such financial statements and the compliance with the standards prevailing,

conducting verification programs at different levels and areas of the Bank, reporting to the Auditing Committee and to the Stockholders General Meeting.

#### **Evaluation about the Performance of Internal Control System**

According to provisions in item 7.7.1.3, paragraph XV, of External Circular Letter 038/2009 of Colombia Finance Superintendence, Banco de Occidente and its affiliate companies evidenced that its Internal Control System is effective when evaluating the components performance: Environment of Control, Risk Management, Control Activities, and Information, Monitoring, Technology Management, Accounting Management, and Internal Bodies.

#### **Risk Management**

In compliance with the directives of Finance Superintendence, the report related to the systems of risks is submitted:

#### **Liquidity Risk and Market Risk**

Monitoring the major indicators to measure liquidity risk and market risk, showed throughout the second half-year 2010, results consistent with the profile of risk defined through the different policies and limits approved, within a conservative framework

In connection with liquidity risk management, the level of asset control was maintained, mainly represented in investment of Colombian Government papers.

Concerning the market risk, the structure of long-term fixed income portfolio structure throughout the second half-year, was represented by average terms under two years.

Through monitoring and control procedures established, the Treasury Risk Unit produced the reports defined to disclose the compliance with all policies and limits, which are submitted to, and discussed in the Finance Committee, Risk Committee, and the Board of Directors. In the same way, different sensitivity analyses and scenarios of the principal risk factors were made and submitted, as a complement of management..

#### Risk of Laundry Asset and Financing of Terrorism.

According to the regulations prevailing, Banco de Occidente has been implementing and complying the Risk Management System aimed at preventing Laundry Asset and Financing of Terrorism (*SARLAT by Spanish abbreviation*), timely submitting to the Board of Directors the reports about Risk Evolution and Management, as well as undertaking significant efforts in order to prevent from materialization of risk **inside the entity** 

For such purposes, opportunely mandatory reports have been submitted to the Financial Analysis and Information Unit (FAIU) Spanish abbreviation), regulated by Colombia Finance Superintendence and fully complying Institutional Training Program through interactive virtual course and classroom training program

In the same way, updating monitoring system and implementation of new controls allowing to efficiently mitigate risk factors and decrease exposure levels, thus meeting management, controlling authorities, and foreign correspondent banks expectations.

#### **Operative Risk**

Banco de Occidente has been complying with the provisions set forth in the regulations and directives prevailing in line with "Rules relative to Operative Risk Management" such regulations duly consistent with ICONTEC NTC 5354 standard, and corroborating its management in the reports submitted both by Internal audit and External audit.

Operative Risk Management System – (**OMRS**) of Banco de Occidente, is supported on the definition of policies, procedures and methodologies through monitoring, self-management, consolidation, registry of events implementation of new controls addressed to reduce exposure levels to risk, such task timely and effectively disclosed both to management and to the Board of Directors

In the same way and as a part of ORMS, the risk of Business Continuance is managed – PCN – by evaluating critical processes, definition and implementation of business recovery strategies, and the conduction of tests. On the other hand, Bank has been complying with the Institutional Training Program by a virtual course "La Gestión del

SARO 2010", addressed to all of the employees, and the classroom training program addressed to new employees and to third parties maintaining contractual relationships with the Bank and those discharging duties in the entity.

This way, it is adequate to state that applying ORMS in the Bank, the operative risk profile evidences low risk qualification, consistent with the definition obtained by other different policies.

#### Minimal Requirements of Security and Quality of Information Management

In compliance with External Circular Letter 052, issued by Colombia Finance Superintendence, according to the report of the last operational period, the Bank, during this period developed a part of the Phase IV the purpose of which is to refine some initiatives of the precedent phases; actually, this phase includes some tasks suspended by reassignment of technology resources to attend a new requirement of Colombia Finance Superintendence.

#### **Legality of Software**

In compliance with provisions in Act 603/2003, Banco de Occidente advises that it has defined the policies, controls, and sanctions to urge the legality of Software used.

#### Certification

According to provisions in article 57 of Decree 2649/1993 it is certified that statements contained in financial statements as of December 31, 2010 have been previously verified, and that the information therein contained has faithfully taken from the accounting books of company, and that they do no contain omission of data, and that all economic facts have been therein recognized.

#### **Personnel**

Throughout the half-year the Bank was supported by the efficient and active cooperation of all employees. For such reason, the top management, in addition to recognize and stress this fact, acknowledges all their valuable participation.

#### **Dividends**

Duly authorized by Colombia Finance Superintendence the payment of a monthly dividend by \$ 105.00 is subject the stockholders consideration and approval.

#### **Efraín Otero Alvarez**

President

The members of the Board of Directors accepted the Activities Report submitted by Bank President as well as Profit Distribution Project of the operational period.

Héctor Vesga Perdomo Henry Jensen Thorín Jorge Herrera Barona Iván Felipe Mejía Cabal Felipe Ayerbe Muñoz Ricardo Villaveces Pardo Alfonso Osorno Cújar Mauricio Gutiérrez Vergara Liliana Bonilla Otoya Gilberto Saa Navia

#### **Opinion by External Audit**

TO. Stockholders

Banco de Occidente S.A. Bogotá

I have audited Banco de Occidente S.A. Balance Sheets as of December 31 and June 30, 2010 and the appropriate Statements of Results, changes of stockholders equity and cash flows, the summary of accounting policies and the other explanatory notes, for the semi-annual periods ended on the dates above.

Bank's Management is responsible for preparing and proper submission of such financial statements in keeping with accounting principles generally accepted in Colombia and instructions of Colombia Finance Superintendence. This responsibility includes: design, implement, and maintain the internal control relevant to the submission of financial statements free from gross material error or fraud, and apply the appropriate accounting policies, as well as the reasonable accounting estimates.

My responsibility consists of issuing an opinion about financial statements based on my audit. I obtained the information and data necessary to properly comply with my duties and made the examinations in accordance with the audit Standards generally accepted in Colombia. Such standards require the compliance with the ethical requirements and the plan to make the audit. In order to obtain the reasonable assurance that financial statements are free from gross material errors.

An audit includes the application of procedures to gain evidence about the amounts and disclosures in financial statements, The procedures selected are dependent on the external auditor's criterion, including the evaluation of risk of gross material errors in financial statements. In such risk evaluation, external auditor takes into account internal control relevant to prepare and submit financial statements in order to design audit procedures according to the circumstances at hand. An audit includes as well the evaluation and application of the appropriate accounting policies and the reasonability of balances accounting estimates made by company's management, as well to assess the appearance of financial statements in general. I consider that the evidence obtained provides a reasonable basis to support my outlook given below.

In my opinion, financial statements aforementioned, taken from the books and attached to this report, reasonably represent all the relevant material issues, Banco de Occidente S.A. financial situation as of December 31 and June 30, 2010 operational periods, the results of its operations and the cash flows for semi-annual periods ended in the dates above, according to accounting principles generally accepted in Colombian and the instructions by Colombia Finance Superintendence, applied in a uniform and consistent manner.

Based on the results of my tests, in my opinion:

- a. Bank's accounting has been made in line with legal provisions and accounting technique.
- b. Operations booked and Managers' actions are in keeping with statutory provisions and decisions of the Stockholders General Meeting.
- c. Correspondence, vouchers of accounts and book of minutes and stock registry are duly kept and maintained.
- d. There are in place appropriate measures of internal control including risk management systems implemented; conservation and custody of Bank's property and third parties property in possession of the Bank.
- e. Colombia Finance Superintendence provisions and directions related to the proper management and accounting of goods received in payment have been fully complied as evidenced in the balance sheet and the statements of results of Risk Management System applicable.
- f. Information contained in the auto-liquidation of Integral Social Security Contribution Declarations, specially those relative to affiliates and their base income for contribution, have been taken from the accounting records and supporting documents. The Bank is not in arrears in connection with contribution to Integral Social Security System.
- g. There exists consistence between financial statements herewith attached and the management report issued by Company's Management.

I made the tracking of answers about recommendation letters addressed to Bank Management and there is no any material relevant issues pending potentially affecting my outlook.

María Ligia Cifuentes Zapata Banco de Occidente S.A. External Auditor T. P. 30070-T Member of KPMG Ltda. January 24, 2011

On the occasion of this merger, Banco de Occidente S.A. issued 12.812.881 shares equivalent to the shareholders of Leasing of Occidente S.A. corresponding to an exchange rate of 0.09350.

#### (3) Principal Accounting Policies

#### (a) Basic Accounting Policies

Accounting and preparation policies of the financial statements of the Bank are in accordance with accounting principles generally accepted in Colombia and instructions of the Financial Superintendent of Colombia.

#### (b) Equivalents of cash

The Bank considers as equivalent to cash, for the purposes of the statement of cash flow, the active and passive positions in operations of monetary market and those related.

#### (c) Active and passive positions in operations of monetary market and those related.

This entry groups together the operations of interbank funds, the operations of repurchase (repo), the simultaneous operations and operations of temporary transfer of values, as follows:

#### **Ordinary Interbank Funds Sold and Purchased**

Interbank funds are considered those directly placed or received by the Bank in other financial entity, without mediating a pact of investment transfer or credit portfolio. They are operations connected to the corporate purpose, which are agreed at a term not longer than thirty (30) calendar days, provided that taking advantage of excesses or supplying liquidity defects it is intended to be pursued with it. Likewise, comprising the transactions denominated "over night", performed with foreign banks by using funds of the Bank.

The returns of interests derived from the operations, are recorded in the statement of results.

#### **Report or Repo Operations**

A repo operation occurs when the Bank acquires or transfers securities, in exchange for the delivery of a sum of money, assuming in such an act and moment the commitment to transfer the property to the "alienating" person the same day or on a later date and at a give prices of securities of the same species and characteristics.

The initial amount is calculated with a discount over the market price of securities of the operation; it is established that during the validity of the operation, the initially given values are substituted by others, and restrictions are placed to the mobility of the values of the operation.

The returns recorded in this item are calculated exponentially during the term of the operation and are recognized in the statement of results. The transferred values of the repo operation must be registered in debt or credit contingent accounts depending on an either open or closed record operation, respectively.

#### **Simultaneous Operations**

A simultaneous operation occurs when the Bank acquires or transfers securities, in exchange for the delivery of a sum of money, assuming in such an act and moment the commitment to transfer or acquire the property again, the same day or on a later date and a determined price, of securities of the same type and characteristics.

The initial amount is not established with a discount over the market price of the securities of the operation; during the operation validity, the values initially delivered by others and restrictions are not placed to the mobility of the securities of the operation.

In this item, the returns caused by the purchaser are registered and that the alienating person pays as cost of the simultaneous operation during the term thereof.

The difference between the present value (delivery of cash) and the future value (final price of the transference) constitutes an income by way of financial returns calculated exponentially during the term of the operation and is recognized in the statement of results.

The transferred values of the simultaneous operation must be registered in contingent credit or debit accounts for active or passive positions, respectively.

#### (d) Investments

The investments acquired by the Bank with the purpose to keep a secondary liquidity reserve, acquire the direct or indirect control of any society of the financial/technical service sector, comply with legal or statutory provisions, or with the exclusive purpose to eliminate or reduce the risk or market the assets, liabilities or other elements of the financial statements, are subject to.

Next, the way the different types of investment are classified, appraised and accounted is indicated:

|                |      |                 | - The financial statements, base to determine the variation are certified with cutting as of June and December every year. | High and Middle Bursatility:  The actualization of the market value of the high and middle bursatility securities or those quoted in internationally recognize foreign stock exchanges, is counted as accumulated not performed profit or loss within the patrimony accounts, with advance or charge to the investment. This procedure is daily performed.              |
|                |      |                 |  | The dividends or profits allotted in kind or cash, including those coming from the capitalization of the account revalorization of patrimony are registered as income up to the sum corresponding to the investment over profits or revalorization of the issuer patrimony counted by the latter since the investment acquisition date, charged to accounts receivable. |

#### **Provisions or Loss for Ranking of Credit Risk**

#### a. Securities or titles of emissions or issuers holding external rankings

The debt securities or titles holding one or several rankings and the debt securities or titles issued by entities ranked by external qualifiers recognized by Colombia Finance Superintendence, cannot be counted for a sum exceeding the following percentages of their net face value of the amortizations performed up to the valorization date.

| Ranking      | Maximum value | Ranking    | Maximum value |  |
|--------------|---------------|------------|---------------|--|
| Long term    | %             | Short term | %             |  |
| BB+, BB, BB- | Ninety (90)   | 3          | Ninety (90)   |  |
| B+, B, B-    | Seventy (70)  | 4          | Fifty (50)    |  |
| CCC          | Fifty (50)    | 5 y 6      | Zero (0)      |  |
| DD, EE       | Zero (0)      | 5 y 6      | Zero (0)      |  |

To determine the provisions over term deposits, the issuer rating is taken.

The provisions of the investments classified to hold up to maturity date, about which a just exchange price is established, correspond to the difference between registered value and fair price.

#### b. Securities or titles of not rated emissions or issuers

The debt securities or titles not holding an external ranking and the debt securities or titles issued by not ranked entities are ranked and provisioned as follows:

| Category | Risk          | Characteristics   | Provisions  |
|----------|---------------|---|---|
| А        | Normal        | Meets the agreed terms in the security or title and hold adequate capacity of capital and interest payment.   | Not applicable.   |
| В        | Acceptable    | Corresponds to emissions with uncertainty factors that might affect the capacity to continue to comply properly with the debt services. Likewise, its financial statements and other available information present weaknesses that may affect the financial situation.                        | The net value cannot be higher than eighty percent (80%) of the acquisition cost. |
| С        | Perceptible   | Corresponds to emissions that present high or middle probability of failure to comply with the opportune capital and interest payment. Likely, its financial statements and other available information show deficiencies in the financial situation that compromise investment recuperation. | The net value cannot be higher than sixty percent (60%) of the acquisition cost.  |
| D        | Significant   | Corresponds to those emissions that present failure to pay the agreed terms in the title, as well as its financial statement and other available information present marked deficiencies in their financial situation, so that the probability to recover the investment is highly uncertain. | The net value cannot be higher than forty percent (40%) of the acquisition cost.  |
| E        | Irrecoverable | Issuers that according to their financial statements and other available information, the investment is deemed irrecoverable.  Likewise, if financial statements are not available with less than six (6) months counted from the valorization date   | The value of these investments must be fully provisioned.                         |

Not subject to this adjustment are the values or securities of internal or external public debt issued or endorsed by the nation, those issued by Banco de la Republica and those issued or backed up by the Guarantee Fund of Financial Institutions -FOGAFIN.

#### Investments overseas

The marketable investments and investments available for sale, represented in securities or bonds of public debt issued abroad, and the securities or bonds of private debt issued abroad by foreigner issuers, are appraised based on the dirty price of purchase (IDB) published by Bloomberg BID at 18: 00, official Colombian time.

The present value or market value of the securities or bonds denominated in a currency other than the dollars of the United States of North America is converted to such currency based on the conversion rates for currencies published on the day of the appraisal on the website of the European Central Bank. When the currency conversion rates are not on the website of the European Central Bank, the conversion rate in relation to the dollar of the United States of North America published by the Central Bank of the concerned country is taken.

#### (e) Portfolio of Financial Leasing Credits and Operations

It records the loans granted by the Bank under the various authorized modalities. Resources used in granting the loans come from own resources, from the public in the form of deposits and from other external and internal funding sources.

The loans are counted by the value of the payment, except for purchases of "factoring" portfolio, which are recorded at cost.

#### **Credit Policies**

The Bank policy to grant credit is based in a major way on the analysis of the financial situation of the client, through the study of his financial statements, and cash flows.

The guaranties are requested primarily when operations are long term or when attention will be for an amount greater than the normal according to the characteristics of the client.

Guaranties assuring a payment source, such as rent pledges, security endorsement, currency bills, etc.; also mortgages, bonds, and especially first order foreign bank endorsements.

Once determined the guaranty, it is properly appraised, through the existing mechanisms. For the coverage amount thereof, the coverage deemed appropriate is studied.

#### **Credit Modalities**

The structure of credit portfolio includes two (2) forms of credit and leasing operations, which can be subdivided into segments or portfolios:

#### - Consumption

Consumption credits are understood, regardless of their amount, the loans granted to natural persons the purpose of which is to finance the acquisition of consumption goods or the payment of services for not commercial or business goals, other than those granted as microcredit.

Consumer portfolio is subdivided into segments of general automotive, general others and credit card.

#### - Business

They are loans granted to natural or legal persons to develop of organized economic activities, other than those granted in the modality of microcredit.

Business credit portfolio is subdivided into the following portfolios:

| Portfolios            | Detail   |
|-----------------------|--|
| Large companies       | More than 15.000 SMMLV* of assets                  |
| Medium-size Companies | Between 5.000 and 15.000 SMMLV of assets           |
| Small Companies       | Less than 5.000 SMMLV of assets                    |
| Natural Persons       | Natural persons who are debtors of business credit |

<sup>\*</sup> SMMLV: Legal Minimum Monthly Salary in Force

#### Assessment and requalification of the credit portfolio

The Bank assesses permanently its credit portfolio risk introducing the corresponding modifications in the respective rankings when there are new information analysis that justify such changes. Therefore, the debtor's credit behavior in other entities is considered and, particularly, whether at the moment of the assessment the debtor registers restructured obligations in accordance with the information coming from the risk centrals all any other source.

The Bank performs the assessment and requalification of the credit portfolio in the following cases:

- When the credits become overdue after having been restructured, in which event they will be reevaluated immediately.
- At least in May and November, having the obligation to register the results of the assessment and the corresponding reevaluation at the next month closing.

#### **Criteria for Credit Risk Assessment**

The Bank assesses business portfolio based on the following criteria: Payment capacity of debtor and co-debtors, as well as the project cash flow, in line with updated and documented financial information; debt service and compliance of the agreed terms; information derived from risks centrals, consolidated with the system and the other business information sources available to the institution, also information related t the economic conglomerate is considered.

In assessing the payment capacity of territorial public entities, the Bank verifies the fulfillment of the conditions established in the laws and other regulatory norms.

In the last quarter 2010, the system of follow-up and portfolio ranking was adjusted. In the individual ranking process, a methodology of automatic ranking portfolio, not assessed individually, was implemented, which is based on risk internal models. This way, ranking is established from the non-fulfillment probability obtained from ranking models, which is also subjected to macroeconomic and sector adjustments.

#### **Credit Risk Ranking**

The main portfolio is classified in the respective risk categories, taking into account the following minimum objectives conditions:

| Homologation with fin<br>indebtedness      | ologation with financial statements and btedness |   | Business  |  |
|--|--|---|---|--|
| Grouped category                           | Report category                                  | Definition  | Minimum conditions  |  |
| "A" Normal risk                            | "AA"   | The credits ranked in this category reflect excellent structuring and attention. The financial statements of  | Already granted credits between 0 and 29 days overdue.  |  |
|  |  | debtors or the project cash flow, as well as the other credit information indicate optimum payment capacity, in terms of sum and origin of the income held by the debtors to attend the required payments.  | New credits with ranking "AA" assigned at the moment of granting.   |  |
| "B" Acceptable risk,<br>Higher than Normal | "A"  | The credits ranked in this category reflect appropriate structuring and attention.  The financial statements of debtors or the project cash flows, as well as the other credit information, indicate adequate payment capacity, in terms of the sum and origin of the income held by the debtors to attend the required payments. | Already granted credits between 30 and 59 days overdue.  New credits with ranking "A" assigned at the moment of granting. |  |

| Homologation with fin indebtedness          | ancial statements and         | Business  |   |
|---|-------------------------------|---|---|
| Grouped category                            | Report category               | Definition  | Minimum conditions  |
| "B" Acceptable risk,<br>higher than normal. | "BB"                          | The credits ranked in this category are attended and protected acceptably, but there are weaknesses that can  | Already granted credits<br>between 60 and 89 days<br>overdue.   |
|   |                               | potentially affect transitorily or permanently the debtor's payment capacity or the project cash flow, so that if not corrected opportunely, they would come to affect the normal collection of the credit or contract.     | New credits with ranking "BB" assigned at the moment of granting.   |
| "C" Perceptible risk                        | "B"                           | In this category are ranked the credits or contracts presenting insufficiencies in the debtor payment capacity or the project cash flow, which compromise the normal collection of the obligation on the agreed terms.      | Already granted credits between 90 and 119 days overdue.  New credits with ranking "B" assigned at the moment of granting.  |
| "C" Perceptible risk                        | "CC"                          | In this category, the credits or contracts presenting serious insufficiencies in the debtor payment capacity or the project cash flow, which compromise significantly the collection of the obligation on the agreed terms. | Already granted credits between 120 and 149 days overdue.  New credits with ranking "CC" assigned at the moment of granting.  |
|   | C,D or E<br>"Non-fulfillment" |   | The credits with 150 days or more overdue and credits showing other events of higher risk. The credits with 150 days or more overdue and credits showing other events of higher risk and unfulfilled credits with assigned PDI equal to a hundred percent (100%). |

The main portfolio is classified in the respective risk categories, taking into account the following:

| Homologation with financial statements and indebtedness |                        | Consumption   |  |
|---|------------------------|---|--|
| Grouped category  | Report category        | Definition  | Minimum conditions   |
| "A" Normal risk   | "AA"                   | The credits ranked in this category reflect excellent attention.  The risk analysis on the debtors reflects optimum payment capacity and excellent credit behavior that insures the collection of the obligation in the agreed terms. | <ul> <li>The new credits with ranking "AA" assigned at the moment of granting.</li> <li>The credits with ranking "AA" obtained by applying the reference model.</li> </ul> |
| "A" Normal risk   | "A" Delay 0 to 30 days | The credits ranked in this category reflect adequate attention. The risk analysis on  | - In this category shall be ranked the new credits   |

| Homologation with fina indebtedness     | ncial statements and           | Consumption  |  |
|---|--------------------------------|--|--|
|   | Report category                | Definition   | Minimum conditions   |
| "B" Acceptable risk, higher than normal | "A" Delay higher than 30 days. | the debtor reflects appropriate payment capacity and adequate credit behavior that allows to infer stability in collecting the obligation in the agreed terms.  The credits ranked in this category reflect adequate   | with assigned ranking "A" at the moment of granting.  The credits with ranking equal to "A" obtained by application of the reference model.  In this category shall be ranked the new credits                              |
|   |                                | attention. The risk analysis on the debtor reflects appropriate payment capacity and adequate credit behavior that allows to infer stability in the collection of the obligation in the terms agreed   | with assigned ranking "A" at the moment of granting.  The credits with ranking equal to "A" obtained by application of the reference model.  |
| "B" Acceptable risk, higher than normal | "BB"                           | The credits ranked in this category reflect acceptable attention. The risk analysis on the debtor shows weaknesses in his capacity to pay and credit behavior that can potentially affect, temporarily or permanently the normal collection of the obligation on the agreed terms. | <ul> <li>In this category shall be ranked the new credits with assigned ranking "BB" at the moment of granting.</li> <li>The credits with ranking equal to "BB" obtained by application of the reference model.</li> </ul> |
| "C" Perceptible risk                    | "B"                            | The credits ranked in this category reflect deficient attention. The risk analysis on the debtor shows shortcomings in the capacity to pay and deficient credit behavior, affecting the normal collection of the obligation under the agreed terms.                                | <ul> <li>In this category shall be ranked the new credits with assigned ranking "B" at the moment of granting.</li> <li>The credits with ranking equal to "B" obtained by application of the</li> </ul>                    |

| Homologation with fin indebtedness | ancial statements and       | Consumption  |  |  |  |
|------------------------------------|-----------------------------|--|--|--|--|
| Grouped category                   | Report category             | Definition   | Minimum conditions   |  |  |
|                                    |                             |  | reference model.   |  |  |
| "C" Perceptible risk.              | "CC"                        | The credits ranked in this category have serious shortcomings in the debtor's capacity to pay and credit behavior, significantly affecting the collection of the obligation in the agreed terms.             | <ul> <li>In this category shall be ranked the new credits with assigned ranking "CC" at the moment of granting.</li> <li>The credits with ranking equal to "CC" obtained by application of the reference model.</li> </ul> |  |  |
|                                    | C,D or E<br>Non-fulfillment | Credits that are in arrears longer than 90 days and the others classified as defaulted.  Loans in arrears longer than 90 days and unfulfilled credits with PDI assigned equal to one hundred percent (100%). | Not applicable.  |  |  |

#### **Credit Ranking with Territorial Entities**

With regards to the ranking of the credits granted to territorial entities, the Bank checks and verifies the compliance with the various conditions laid down in the Laws 358 of 1997, 550 of 1999 and 617 of 2000.

- Ranked in category "D" are the credits where the territorial entity pledges revenues as collateral, when there are no adequate mechanisms to reasonably verify that they do not have been previously pledged as a collateral of another obligation; the guaranteed credits with pledge of revenues that are insufficient to cover the sum of the obligation and when the territorial entity has given to the resources of the credit a destination other than that prepared by the law.
- Ranked in category "E" are the credits guaranteed with pledge of revenues if they have previously been the Ministry of Finance and Public Credit, or of the respective department that do not have the same and the credits granted to territorial entities that having adopted performance plans, as it has been established compromised as a collateral of another obligation; the credits that requiring indebtedness authorization of by the Law 358 of 1997, have not obtained the manifestation of conformity. In these cases, provisions must be constituted for the hundred point zero percent (100.0%) of the obligation without taking into account the collateral

#### **Restructured Credits**

Restructured credit means that one which by signing any legal business, aims at modifying the originally agreed conditions in order to allow the debtor to attend appropriately his obligation. To these purposes, novations are deemed restructuring. Prior restructuring a credit, it should be reasonably confirmed that the same will be recovered under the new conditions.

The credit reliefs ordered by laws, such as those laid down in the law 546 of 1999, shall not be considered as restructuring.

Credits improve ranking after having been restructured only when the debtor demonstrates behavior of regular and effective payment to capital, consistent with a normal credit behavior, provided that his capacity to pay remains or improve.

#### **Extraordinary Restructurings**

Credits with extraordinary restructuring are framed, among others, within the following parameters: restructuring terms do not exceed seven (7) years for its total repayment, in the case of territorial entities, the term is up to ten (10) years; the agreements are accompanied by a Management Agreement to ensure compliance with the restructuring agreement and the feasibility of the company; reversing supplies or improving the ranking of the restructured debtors if not duly proven the feasibility or compliance with the restructuring agreement terms, is considered unsafe practice; When a restructuring agreement is not complied with, the debtor shall be ranked immediately in the category he was before restructuring or one of higher risk.

#### Restructurings under Law 550 of 1999

The Law 550 of 1999 promotes and facilitates business revival and restructuring of the territorial entities. From the date that the restructuring negotiations starts, the Bank suspends interests accrual over the existing credits and maintains the ranking they had on the negotiation start date.

#### Restructurings under Law 617 of 2000

They correspond to restructurings arising from the subscription of Fiscal and Financial Consolidation Programs.

#### Restructurings under Law 1116 of 2006

Law 1116 establishes the insolvency legal regime, which aim is credit protection and the retrieval and conservation of the company as unit of economic exploitation and employment generating source, through the processes of reorganization and receivership; the process of reorganization intends, through an agreement, to preserve viable enterprises and normalize its commercial and credit relations through its operational, administrative, of assets or liabilities restructuring.

From the date that restructuring negotiation starts, the Bank suspends the interests accrual over the existing credits, and at least maintains the ranking it had on the negotiation start date.

The Law seeks to structurally correct the excesses of operating expenses of the territorial entities. It established that the nation would give guarantees to the obligations undertaken by the territorial entities with financial entities watched over by the Colombian Financial Superintendence, when all the requirements laid down are fulfilled; among others, that fiscal adjustment agreements were signed before June 30, 2001. Such a guarantee would be up to forty point zero percent (40%) for credits existing as of December 31, 1999, and up to a hundred percent (100%) for the new credits intended for the fiscal adjustment.

Among the features of these restructurings, the following are mentioned: provisions made over the obligations subject of restructuring are reverted in the part which has been guaranteed by the nation and the part of the obligations subject to restructuring that do not have guarantee of the nation will be able to keep the ranking they had as of June 30, 2001.

#### (f) Write-off of Loans and Financial Leasing Operations

Credit portfolio, in the opinion of the Administration unrecoverable or has remote or uncertain retrieval, is susceptible of punishment unsuccessfully attempting collection actions, in accordance with the concepts issued by the collection lawyers and firms previously approved by the Board of Directors.

The write-off does not relieve the Bank to continue the steps of retrieval that are deemed appropriate and it requires that the credits are 100% provisioned in capital, interests and other concepts.

#### (g) Provision for Credit Portfolio and Financial Leasing Operations

#### Individual Portfolio Provisions under models of reference

The Bank applies the methodology of calculation of provisions in cumulative phase based on the monthly assessment of the behavior of the indicators of deterioration, efficiency, stability and growth:

|            | Cumulative | De-cumulative |
|------------|------------|---------------|
|            | Stage      | Stage         |
| Impairment | < 9%       | > = 9%        |
| Efficiency | < 17%      | > = 17%       |
| Stability  | < 42%      | > = 42%       |
| Growth     | > 23%      | < = 23%       |

Based on above, portfolio individual provision was calculated as the sum of Recycle Individual Component and contra cyclic Individual Component.

Proclaim Individual Component (**PIC**) corresponds to the portion of credit portfolio individual provision reflecting credit risk of each debtor, in the present. PIC is the expected loss calculated with Matrix A.

Contracyclic Individual Component (CIC): corresponds to the portion of credit portfolio individual provision reflecting the possible changes in credit risk of debtors where impairment of such assets increases. Such portion is constituted in order to reduce the impact on statement of results when such situation occurs. CIC corresponds to the higher value between CIC of the precedent month affected by the exposure, and the difference between the loss expected of matrices B and A of the month when evaluation is made.

Expected loss estimation results from the application of the formula below:

#### Expected Loss (EL) = [Probability of default)] x [Asset exposition at the time of default] x [Loss due to default]

Probability of Default (PD) is the probability that, during the timeframe of twelve (12) months the debtors fail to comply, and for such purposes the following matrices are considered:

#### **Commercial Portfolio**

|    | Big Company |          | Small Company |          | Medium Company |          | Natural Persons |          |

#### **Lining up Rules**

Bank applies lining up rules of debtor qualifications according to the following criteria:

- a. Following the constitution of provisions and qualification homologation, monthly and for each debtor, the Bank performs the internal lining up, and for such purpose it is carried to the higher risk category the credits of the same modality granted to debtor, safe for enough reasons for its qualification in any Category of less risk.
- b. As the Bank is under the obligation to consolidate financial statements, it assigns equal qualification to the credits of the same modality granted to a debtor, unless there are enough reasons to be qualified in a lower risk Category.

#### (h) Acceptances, Spot Operations and Derivatives

Register the value of bank acceptances created by Bank on account of its clients and those ones created on account of its correspondents. In the same way, the bank registers spot operations and contracts entered by the Bank, of the operation with derivatives, such as forward, carrousel, futures, swaps and options

#### **Bank Acceptances**

Bank acceptances have a maturity term up to one (1) year and only originated from import and export of goods or sale/purchase of movable goods in the domestic market.

j

At the time of acceptance of letters, its value is simultaneously accounted for in the asset and in the liabilities, as "bank acceptance in term," and if at the maturity they are not submitted to be collected,, they are ranked under the title "bank acceptances after the term". If when payment is made, they have not been covered by the purchaser of goods, they will be reclassified to the account of loans "bank covered acceptances".

Alter maturity date, bank acceptances are subject to the conversion established to exigibilities at sight and before 30 days.

#### **Spot Operations**

Include the operations recorded with a compensation term equal to the date of registry of the operation or up to 3 business days from the day following the operation was made.

Financial assets acquired in spot operations are booked in the date of compliance or liquidation rather than in the negotiation date, unless these two date are coincident. Without prejudice of the foregoing, the changes of market value of the documents sold must appear in the statement of results as from the date of negotiation, as applicable.

Under the date of liquidation, the seller records financial asset in its balance until the delivery of the asset, a right to receive the cash derived from the transaction and an obligation to deliver the asset negotiated. The later is valued at market price according to regulations prevailing for such investments and the variance of valuation of such obligation recorded in statement of results.

On the other hand, purchaser of asset does not records financial asset until the delivery thereof, but a right to receive asset is accounted for, which will be valued at market price, and an obligation to deliver the cash agreed on in the operation.

When operation is actually made, purchaser and seller of asset, will revert both the right and the obligation recorded since the time the negotiation was made.

#### **Derivative Financial Instruments**

Operations with derivative instruments and operations with derivatives are valued on a daily basis at fair Exchange price, considering the following:

Exchange fair price of basic derivative financial instruments when there exists market price is that resulting from applying formulae of valuation set forth bay Colombia Finance Superintendence.

Methodology, parameters, and sources of information adopted to value basic derivative financial instruments are consistently used, at least during one (1) year, from the modification. The same methodology is used to value basic derivative financial instruments with similar characteristics, as long as they refer to the same underlying.

Derivative financial instruments giving fair positive exchange price are recorded in the asset, separating the value of right from the obligation, excepting when the operations where accounting records is made in a single account. Those giving negative exchange fair price, i.e., unfavorable price to the controlled entity are recorded in the liabilities, by doing the same separation. When the fair price of exchange of financial derivative instrument is equal to zero (0), either in the initial date or in any other subsequent date, is accounting records is made in the asset.

#### (i) Current asset, Received in Payment and Delivered back asset

Records the asset received by the Bank in payment of outstanding balances derived from credits. Asset received in payment represented in immovable property are received based on a commercial appraisal technically determined and the movable property, stocks, and participations, based on market price.

To account for such asset, the following conditions shall be taken into account:

- Initial record is made with the value determined in the judicial award or otherwise, the value agreed upon with the debtors.
- When asset received in payment is not in conditions to be sold, its cost is increased with the expenses necessary for the asset to be marketable.
- If between the value the asset is received and the amount of credit to be paid results a credit balance in favor of debtor, such difference is accounted for as an account payable, if the value of asset is short to cover the whole obligation, a provision equal to the shortage is made.
- Movable goods received in payment corresponding to investment papers, they are valued applying criteria indicated in Note 3(d) for investments.

The assets which are not used in the leasing operations correspond to assets for own use the Bank is no longer using to develop the operations. Such assets are depreciated up to the time of disposal computation the same as Bank fixed asset to the purposes of the limits set forth in item 1.2, chapter seventh of title of basic legal circular letter form Colombia Finance Superintendence.

#### (j) Provision Current Asset Received in Payment and Delivered Back

#### a. Immovable Property

A provision is made in monthly installments within the tax year following the receipt of the property, equivalent to thirty percent (30%) of acquisition cost, and increased in monthly installments within the second year by thirty percent (30%) additional until reaching sixty percent (60%). Upon the completion of legal term to the sale, and the extension has not been authorized, the provisions is increased to eighty percent (80%), unless extension is obtained, in such event, the twenty percent (20%) may be made within the term of the extension.

When acquisition cost of the immovable property is lower than the value of the debit recorded in the balance sheet, the difference is immediately recognized in the statement of results

When the commercial value of the immovable property is lower than the booked value of the asset received in payment, a provision for the difference is accounted for.

#### b. Movable Property

For movable property, a provision equivalent to thirty five percent (35%) of the acquisition cost of the property received is made within the following year the property is received, and increased in the second year by thirty five percent (35%) until reaching seventy percent (70%) of the value booked before provisions. Upon the completion of the legal terms to sell the asset, the provisions will be one hundred percent (100%) of the value of property before provision, unless an extension is obtained, and in such event the additional thirty percent (30) may be made during the extension.

When the commercial value of property is less that the booked value of the goods received in payment, a provisions shall be accounted for equivalent to the difference.

Without prejudice of the provisions aforementioned, the movable goods received in payment corresponding to investment papers are value by applying criteria in the note 3(d) taking into account its classification as marketable investments available for sale or to maintain up to maturity.

If goods received in payment are placed in portfolio or in financial leasing operations, the profit derived as a result of the transfer of good to the accounts of the group, shall be deferred in the term where operation was agreed on.

#### (k) Property and Equipment

Records tangible asset acquired, constructed or under import process, use in a permanent manner in the development of the line of business and the useful life of which is more than one (1) year. This includes cost and indirect expenses caused until the time the asset is under use conditions.

Additional, improvements, and extraordinary repairs are significantly increasing useful life of asset, are booked and additional value and the expenses related to maintenance and repairing made to maintain such assets are included in debited to expenses as they are caused.

Depreciation is recorded using straight-line method y according to estimate number of useful life years of the assets. Annual depreciation rates of each item of asset are the following:

| - | Buildings                               | 5%  |
|---|---|-----|
| - | Office equipment, furniture and fixture | 10% |
| - | Computing Equipment and vehicle         | 20% |

As from 1997 the Bank adopted the method of balance reduction in depreciation of buildings, for tax purposes. The system of balance reduction consists of depreciating a fixed rate on an annual basis, the not depreciated balance of the precedent years; the rate is equal to the *nth* square root of balance over the cost.

For the calculation a residual value was established making part of total amount in the last useful-life of the asset for it to be totally depreciated.

#### (I) Asset given in Operative Leasing

Include the cost of goods given in operative leasing delivered by the entity to be used by the user following the respective agreement,.

Where in contracts of operative leasing it is provided that together with the payment of rent ninety percent (90%) more the value of good is amortized, depreciation of such goods will be made during the term of the agreement and using the methodology of financial depreciation according to contractual conditions.

#### (m) Branch Offices and Agencies

Accounts for the transactions of the operations made between Top Management and the Offices.

Balances are monthly reconciled and the pending ítems resulting are regularized during a term no longer than thirty (30) calendar days.

At the accounting closing net balances are reclassified, to reflect the accounts from branch officer and agencies, to asset or liabilities accounts and the respective income and expenses are recognized.

#### (n) Prepaid Expenses and Deferred Charges

Prepaid expenses correspond to expenditures incurred by the Bank in the activity development which benefit or service is received during several periods; they may be recoverable an involve the successive supply of services to be received.

Deferred charges correspond to costs or expenses that benefit future periods and are not susceptible of recovery. Amortization is recognized from the day they contribute to produce income.

Amortization is made as indicated below:

#### **Prepaid Expenses**

- Interest during prepaid period.
- Insurance during policy term
- Equipment maintenance during equipment useful-life.
- The other prepaid expenses during the period the services are received or cost o expenses are incurred

#### **Deferred Charges**

- Organization and preoperational expenses during a period no longer than two (2) years.
- Restructuring during a time period no longer than two (2) years.
- Studies and project, a time d no longer than two (2) years.
- Computing software during a time period no longer than two (2) yeas
- Improvements to property leased during the shorter period between the term of the respective lease agreement, overlooking the extensions, and the probable useful-life of the property.
- Stationery according to actual consumption.
- Commissions placed in long-term securities of bond redemption.
- Deferred income tax "debit" for temporary differences at the time the legal and regulatory requirements are complied as provided in the tax regulations.
- Real Estate tax.
- Contributions and affiliations during the prepaid time period.
- Deferred charges during a time period no longer than three (3) years.

#### (o) Goods to be placed in Leasing Agreements

The new goods acquired by Banco de Occidente which contract has not started due to any pending legal requirements are entered in this accounting item, and those goods under in operative leasing delivered back by leasee are also entered in this item. The devolution of those goods shall be accounted for by its book cost (cost less accrued depreciation) it is not subject to depreciation but rather to the applicable provisions.

#### (p) Intangible Goods

Under Resolution 0828, of May 19/2006, Colombia Finance Superintendence authorized the take-over of Banco Unión Colombiano S.A. The mercantile credit resulting from the difference between the value paid and net patrimony as of the date of the take-over, of Banco Union Colombiano, is redeemed by exponential system during 20-year term and the time already redeemed according to provisions in the External Circular Letter Nº 034/2006 of Colombia Finance Superintendence . In any case, the Bank may voluntarily elect a shorter period.

Currently, the Bank values at market price the associated business lines with mercantile credit to determine whether or not there is loss or impairment of price. Valuation is made by using flow of profits generated by each business line identified as cash independent generator.

#### (q) Valuations

#### Asset subject to valuation

- Investments available to sale in certificates of participation (low or minimum marketability or with no market quotation).
- Property and Equipment, specifically immovable property and vehicles.
- Art and Culture goods.

#### **Booking**

Valuations of investment available for sale in certificates of participation are booked based on issuer's patrimonial variances.

Valuations of real estate property are determined by comparing the net cost to the value of commercial appraisals made recognized and independent persons or firms.

If any devaluation will occur, considering the Standard of reasonable prudence,, for each real estate property, a provision is made.

Valuation of art and culture goods is recorded taking into consideration conservation status of the works, originality, size, technique and quotation of similar works.

Valuations over goods received in dation of payments and delivered back are not recorded.

#### (r) Prepaid Income

This ítems include deferred and prepaid income received by the Bank during operacional activity which are amortized during the operacional period when services are actually supplied or caused.

#### (s) Estimate Liabilities and Provisions

The Bank records provisions to cover estimate liabilities, taking into account that:

- There exists an acquired right, and as a result, an obligation assumed.

- The right is payable or probably, and
- Provision is justifiable, quantifiable and verifiable.

In the same way, this item includes the estimated valued for tax, contributions and affiliations concepts.

#### (t) Retirement Pensions

The Bank has currently the actuarial calculation totally amortized, that is, it is maintained updated on a semiannually basis and totally amortized during the respective half-year operacional period.

Retirement pension payments are charged against the provision made

#### (u) Legal Reserve

According to legal provisions, any bank institution must make a legal reserve no less than 50% of the subscribed capital, made up by the liquidated profit from every operational period.

The reduction of reserve under the minimum limit will be reasonable when such reduction is aimed at wiping off loss in excess of undistributed profit. The reserve can be used neither to pay dividends nor to cover expenses or loss during the time when the entity has undistributed profit.

#### (v) Recognition of Income by Financial Returns and Financial Leasing

Income from financial returns and financial leasing and other concepts, are recognized at the time they are accrued, excepting interest, indexation, exchange adjustment, among other concepts resulting from:

- Commercial credits overdue more than 3 months
- Consumption credits overdue more than 2 months.

Therefore, the statement of results will not be affected until they are actually collected. While collection is actually made, the corresponding record is made in the memorandum accounts.

In those events that, as a result of restructuring agreements or any other modality of agreement, interest capitalization recorded in memorandum accounts of written-off portfolio is suggested, including capital, interest, and other concepts, they will be booked as deferred credit in the code 272035 and its amortization to the statement of results will be made commensurately to the values actually received.

#### (w) Related-Parties

Related-parties are considered:

- The companies where the Bank holds management or financial control and are subject to (subordinate) consolidation.
- Stockholders individually holding more than 10% of Bank stock capital and those which individual participation is less than 10%, and respect of which exist operations exceeding 5% technical patrimony
- The members of the Board of Directors and the Managers

#### (x) Conversion of Transactions in Foreign Currency

As intermediary in exchange market, the Bank may directly make purchase and sales of foreign currency derived from the exchange market.

Operations in foreign currency other tan dollar, are converted into American Dollars, and the re-converted to Colombian Pesos, using the market representative exchange rate (MRR) calculated on a daily basis and certified by Colombia Finance Superintendence. At the closing of the respective operational period on December 31 and June 30, 2010, the exchange rates were \$1,913.98 (in pesos) and \$1,913.15 (in pesos), respectively

"Own position" in foreign currency of exchange market intermediaries is defined as the difference between the rights and obligations determined in foreign currency, recorded inside and outside the balance sheet, realized or contingent, including those liquidable in Colombian legal tender.

"Own Spot Position" is the difference between all asset and liabilities in foreign currency according to PUC excluded the investments available for sale in certificates of participation, carrousel operations, futures forward contracts, swaps and profit or loss in operation valuations, and asset and liabilities in foreign currency.

Leverage gross position is defined as the summation of i) the rights and obligations in fixed term and future contracts in foreign currency; ii) spot operations in foreign currency with compliance between on banking day (t+l) and two bank days (t+2), and iii) the exchange exposure to debit contingencies and credit contingencies acquired in options and derivatives negotiations over the type of exchange.

Arithmetic average of three business days of own position will exceed the equivalent in foreign currency to twenty percent (20%) and fifty percent (50%) of technical patrimony, respectively.

The minimum amount of the arithmetic average aforementioned of the own position may be negative without exceeding the equivalent in foreign currency to five percent (5%) of technical patrimony. The spot own position may not be minus.

Arithmetic average of three (3) business days of leverage gross position will not exceed five hundred percent (500%) of the amount of net patrimony.

For such purposes, the Bank determines technical patrimony in Dollars based on financial statements of the precedent second calendar month and applying Exchange rate, to the re-expression of figures in foreign currency of the precedent month.

As of December 31 and June 30, 2010, the asset in foreign currency amounted to US\$769,027,719.46 (Dollars) and US\$154,299,929.90 (Dollars) and liabilities to US\$773,657,536.18 (Dollars) and US\$158,857,341.81 (Dollars), respectively

.

#### (y) Contingent Accounts

In these accounts the operations whereby the Bank acquires any right or assume and obligation are recorded, which effectiveness is conditioned to the occurrence or non occurrence of any Fact, depending on the future, eventual or remote factual conditions.

In the same way, monthly rent least are recorded from the time of causation in the lease accounts receivable.

Among those accounts lease agreements about to expire are primarily included, as current portion is recorded the rents and call options expiring during the next year, and as non-current, the portion of such agreement which will expire after the first year.

Among the debtor contingencies financial returns are recorded from the time the causation is suspended in the accounts of portfolio credits.

#### (z) Memorandum Accounts

In this accounts the operations made with third parties are recorded, that by its nature will not influence Bank's financial situation. In the same way, fiscal memorandum accounts are included, where the figure are recorded to draw up tax returns; in same way, it includes those accounts of record used for tax purposes, of internal control or management information.

#### (aa) Net profit per Stock

As of December 31 and June 30, 2010 net profit per stock was computed according to the weighed average of outstanding stocks that was 149.840.314 and 149.840.233, respectively.

# (4) Major Differences between Especial Standards and Accounting Standards Generally Accepted in Colombia

Especial standards set forth by Colombia Finance Superintendence show some differences with the accounting standards generally accepted in Colombia, as follows:

#### **Property, Pant and Equipment**

Accounting standards generally accepted determine that at the closing period the net value of property, plant and equipment, sic adjusted value exceeds twenty (20) minimum legal monthly salaries, should be adjusted to its surrender value or its present value, recording the valuations and provisions necessary while especial standards do not show conditions for this type of asset

#### **Premium of Stock Placement**

The especial provisions provides the Premium of stock placements recorded as a portion or legal reserve, while the generally accepted standard indicates that it shall be recorded in the patrimony

On December 31 and June 30/2010 the Bank had recorded forward in Legal Tender and foreign currency with terms agreed upon laws than one year.

For derivative operations specific indebtedness levels are established by each counterparty, which are defined based on financial analysis and rating qualification assigned by the model. Such levels are prevailing for no more than one year and allow for limiting the operations with counterparties according to the specific risk.

The following is the itemization of profit or loss in the valuation of spot operations and derivatives for the semi-annual operacional periods ended on December and June 30, 2010:

| Derivatives  |                 | Dec. 31-10   | Jun. 30-10   |
|--|-----------------|--|--|
| Foreign currency purchase contract   | \$              | 5,5  | 58,7   |

Bank management is doing the procedures of sale within the terms provided in the provisions; when alienation is not possible, the appropriate extension is requested.

For alienation purposes, the detail has been periodically supplied to the administrative personnel, and press releases have been made, or letters offering to individuals or entities potentially interested in the acquisition and a direct offer to the clients is also forwarded.

Appraisals were made by persons acknowledgeable of the specific mater, to determine the commercial value of marketable goods, received in payment at the time of receipt the goods.

#### (12) Property, Equipment and Goods given on Operating Lease

| Amortization carried to expenses         | 767,3         | 276,0      |
| Actuarial valuation at the end half-year | \$<br>3.705,9 | 3.147,3    |

## (20) Estimate Liabilities and Provisions

Below estimated tax liabilities detailed:

|                              | Dec. 31-10     | Jun. 30-10 |
|------------------------------|----------------|------------|
| Income and Complementary Tax | \$<br>11.943,9 | 38.191,1   |
| Commerce and Industry        | 352,0          | 3.413,2    |
| VAT no deducible             | 5.189,1        | 4.805,7    |
| Real Estate tax              | -              | 6,1        |
|                              | \$<br>17.485,0 | 46.416,1   |

# (21) Equity Capital

As of December 31 and June 30, 2009, the following detail is shown:

|  | Dec. 31-10    | Jun. 30-10 |
|--|---------------|------------|
| Authorized Capital                                 |               |            |
| Divided into 200,000,000 stocks                    | \$<br>6.000,0 | 6.000,0    |
| Capital to be subscribed                           |               |            |
| 50.159.686 and 50.159.707 stocks as of Dec. 31 and |               |            |
| June 30, 2010, respectively.                       | (1.504,8)     | (1.504,8)  |
| Subscribed and Paid-in Capital                     |               |            |
| 149.840.314 and 149.840.233 stocks as of Dec. 31   |               |            |
| and June 30, 2010, respectively.                   |               |            |
|  | \$<br>4.495,2 | 4.495,2    |

Par value per stock: COP 30.00.

# (22) Legal Reserve

Legal Reserve is made up as follows:

|                                |    | Dec. 31-10  | Jun. 30-10  |
|--------------------------------|----|-------------|-------------|
| Appropriation of profit        | \$ | 715.819,6   | 623.415,4   |
| Premium in placement of stocks |    | 520.666,0   | 520.666,0   |
|                                | Ś  | 1.236.485.6 | 1.144.081.4 |

Premium in stock investment includes capitalization of patrimony revaluation account, originated on the integral indexation for \$272,018.5.

## (23) Occasional Reserves

As of December 31 and June 30, 2010, occasional reserve balance corresponds to profit appropriations made by decision of the Stockholders General Meeting; the detail is the following:

|   | Dec. 31-10      | Jun. 30-10 |
|---|-----------------|------------|
| Stability of dividend at disposal of the shareholders |                 |            |
| general meeting                                       | \$<br>20.841,8  | 26.568,3   |
| Credit portfolio protection                           | 24,9            | 24,9       |
| Fiscal Dispositions                                   | 158.564,3       | 153.870,9  |
| To protect Investments                                | 26.568,3        | 20.841,8   |
|   | \$<br>205.999,3 | 201.305,9  |

# (24) Contingent and Memorandum Accounts

Below the detail of contingent accounts:

# (28) Other Non Operational Income

Below the detail of other non-operational income:

|                                  | 31 Dec- 10    | Jun. 30-10 |
|----------------------------------|---------------|------------|
| Renting                          | \$<br>1.090,7 | 1.146,1    |
| Income Goods Received in Payment | 66,0          | 32,6       |
| Other                            | 1.001,0       | 5.843,4    |
|                                  | \$<br>2.157,7 | 7.022,1    |

# (29) Income and Complementary Tax

The following is the conciliation between accounting unit and net taxable estimated by six-month periods ended on December 31 and June 30,, 2010:

| a) Income:   | Dec. 31-10      | Jun. 30-10 |
|--|-----------------|------------|
| Profit before Income Tax                                 |                 |            |
| Plus (less) items increasing (decreasing) fiscal profit: | \$<br>273.267,8 | 234.634,0  |
| Fines and sanctions                                      | 1.963,8         | 1.032,8    |
| Non-deducible provisions                                 | 8.271,2         | 872,6      |
| Amortization deferred depreciation                       | (23.236,3)      | (4.183,9)  |
| Especial deduction in Fixed Asset Investment of          |                 |            |
| 30% for year 2010 and 40% for year 2009,                 |                 |            |
| respectively   | (21.822,9)      | (11.845,0) |
| Other non-deducible expenses                             | 31.109,7        | 24.477,4   |
| Net difference, income between accounting                |                 |            |
| valuation and fiscal investment valuation                | 47.546,1        | (8.378,4)  |
| Forward contract valuation, net                          | (9.080,4)       | (29.592,8) |
| Accrued dividends 2008, payable and not                  |                 |            |
| registered in 2009                                       | -               | 14.729,2   |
| Mercantile credit amortized                              | (3.530,3)       | (3.579,4)  |
| Other tax deductions                                     | 634,2           | (23.952,0) |
| Dividends and participations non taxed                   | (58.392,9)      | (82.576,4) |
|  |                 |            |

| Exempt Income                  | (15.736,5)     | (19.183,2) |
|--------------------------------|----------------|------------|
| Taxable Base                   | 230.993,5      | 92.454,9   |
| Current Income Tax             | 76.227,9       | 30.510,0   |
| Deferred Income                | (4.392,0)      | 15.780,8   |
| Excess of income tax provision | (588,1)        | 891,9      |
| Total Income Tax               | \$<br>71.247,8 | 47.182,7   |

Deferred tax results from the following temporary differences between accounting and fiscal accrual:

| Provisions, Net for:           | Dec. 31-10      | Jun. 30-10 |
|--------------------------------|-----------------|------------|
| Industry and commerce          | \$<br>(533,3)   | 690,4      |
| Property Tax                   | 2,0             | (2,0)      |
| Forwards Valuation             | 2.996,5         | 9.765,6    |
| Total deferred tax receivable  | 2.465,2         | 10.454,0   |
| Amortization Mercantile Credit | 1.165,0         | 1.181,2    |
| Investment Valuation           | (15.690,2)      | 2.764,9    |
| Deferred Depreciation          | 7.668,0         | 1.380,7    |
| Net deferred tax payable       | \$<br>(4.392,0) | 15.780,8   |

The following is the accounting and fiscal equity reconciliation:

| b) Equity Conciliation  | Dec. 31-10        |
|---|-------------------|
| Accounting Equity   | \$<br>2.592.622,5 |
| Plus (less) items increasing (decreasing) equity for tax purpose: |                   |
| Fiscal readjustment of fixed asset, net                           | 39.292,0          |
| Estimate liabilities & provisions involving no fiscal liabilities | 35.982,9          |
| Provisions of asset involving no fiscal diminution                | 8.129,0           |
| Accrued deferred tax payable                                      | 67.396,4          |
| Other net asset   | (78.142,1)        |
| Accounting valuation of net fixed asset                           | (195.238,9)       |
| Accrued deferred tax receivable                                   | (2.061,4)         |
| Accrued deferred depreciation                                     | (73.722,3)        |
| Fiscal Equity   | \$<br>2.394.258,1 |

Income tax returns of the tax and 2009 are within the legal term of revision by National Tax Administration.

## (30) Disclosure of Risks

## **Objective**

The objective is to maintain in the organization a risk control and management culture allowing for the conduction of the different business of the Bank in the commercial and treasury activities within reasonable and measurable exposure margins, allowing for impacting business and supporting the generation of economic value.

## **Legal Framework**

All activities carried out in developing a proper market risk management, shall be consistent with the Basic Accounting Financial Circular Letter CD 100, 1995, specially related to the following sections:

- Chapter I: Classification, Valuation and Investment Valuations
- Chapter VI: Criteria and Procedures to Evaluate Liquidity Risk Management Asset and Liabilities Management (ALM).
- Chapter XVIII: Derivatives Valuation and Booking.

Chapter XXI: Standards Relative to Market Risk Management System (MRMS)

Liquidity Risk Management System (LRMS) is the basic tool to identify measure, control and monitor Liquidity Risk the company is permanently exposed to. It contains the following elements and definitions: policies, procedures, documentation, organizational structure functions, technological support, and information disclosure systems (internal and external reports), used from time back for Liquidity Risk Management which have been updated in line with market, economy and regulations changes.

#### The risks are defined as follows

#### Credit and/or Counterpart Risk

Credit risk is defined as the possibility for an entity to incur in loss and impairment of asset as a result of the failure of clients to timely or efficiently comply with the terms agreed upon in the respective contracts.

In Banco de Occidente credit indebtedness levels, both for commercial operations and treasury operations, are analyzed per credit areas and then subject to the consideration and approval by the appropriate business units, specially by Credit Committee and the Top Management or the Board of Directors.

In the analysis, customers' financial statements are taken into account, at least from the last two operational periods, the cash flow and other elements necessary to make informed decisions. Treasury operations are not independent on other operations assigned to the customers. Especial emphasis is made on customer's payment capacity, both through cash flow and by the analysis of liquidity ratio, current liabilities participation on sales, company's operative cycle and solvency and the other measures integrating the credit analytical model.

Since 2002 operational period, the Bank started a Project to develop Credit Risk Management System (**CRMS**), which includes credit risk management procedures and policies, structuring of database with customer's historical information, and customer's behavior, development of models for granting following up and qualification of customers, estimation of expected loss, among others. This development has been adopted based on regulations changes (Chapter II of Accounting and Financial Basic Circular Letter 100 / 1995 from Colombia Finance Superintendence).

Financial entities need to submit the model (by type of credit) to be approved by Finance Superintendence, before its practical application. Those entities failing to submit the internal model or those ones which internal model has been objected need to apply the reference models developed by Finance Superintendence. The model for commercial portfolio began to take force as from July 1/2007 and that for consumption portfolio began to take force from July 1, 2008. For housing and microcredit the reference models have not been developed as yet.

During the first half-year 2008 the Bank began to develop activities to implement Consumption Reference Model (**CRM**) for customer qualification and provision estimates according to the Annex 5 of Chapter II of Circular Letter 100 / 1995, as well as the activities to develop the analysis of consumption portfolio harvests since January 2005, based on the External Circular Letter 012, 2008.

On May 2009 the entity analyzed the development of activities originated from the recommendations made by Colombia Finance Superintendence, as a result of the evaluation of CRMS internal model, communicated on December 2006, which were grouped into five sources of work: Policies, Procedures, Modeling, Database, and Training. This way the weaknesses found were remedied.

Since October 2009 the Entity is working in line with External Circular Letters 035 of September 2009 and 054 of December 2009, where the new portfolio provisions system is defined, which includes the definition of two components of expected loss (Procyclic Individual Component PIC) and Contracyclic Individual Component—CIC) and the calculation of four (4) indicators determining if the entity can be located in the cumulative or deacumulative phase of its provisions.

#### **Liquidity Risk**

Liquidity risk is understood as the contingency of the impossibility to fully and timely comply with the payments in the appropriate dates, due to the deficiency of liquid resources or to the need to assume monthly costs.

As from April 1, 2009 the new chapter of "Standards relative to Liquidity Risk Management" began to take force, which derogated the former chapter related to "Criteria and Procedures to Manage Asset and Liabilities", which makes emphasis mainly on Liquidity GAP indicator.

The degree of exposure to risk is determined by the calculation of Liquidity Risk Indicator (LRI). This indicator compares the level of liquid asset adjusted by market liquidity, Exchange risk, and cash position required against net liquidity requirement (NLR). The major characteristics are the following:

- LRI is calculated on a weekly basis (Friday closing date) and reported the second business day each week.
- Net Liquid Asset corresponds to the sum of available, investments negotiable in certificates of indebtedness, investments negotiable in certificates of participation, the investments negotiable for sale in certificates of indebtedness and the investments until maturity.
- Net Liquidity requirement only may include contractual maturities of asset, liabilities and positions out of balance (does not contain forecasts).
- Withdrawals of deposits at sight will be adjusted by the Net Withdrawal Factor NWF, which is computed as the major monthly withdrawal since December 1996.
- The timeframes are distributed by less than 7 days, 7 to 15 days, 15 to 30 days, and 30 to 90 days.
- It is considered that any credit entity may be producing a significant exposure to liquidity risk when in a given weekly report; Liquidity Risk Indicator LRI at one week is minus.
- If a minus LRI is found at 7 days, the bank must report in writing to Colombia Finance Superintendence the basic reasons giving rise to the fall of indicator under the minimum limit set forth, including the strategies necessary to face with such illiquidity situation.

#### **Market Risk**

The possibility for any credit entity to incur in loss and diminution of technical patrimony as a result of the changes in the price of financial instruments where the entity maintains positions in or off the balance. Such changes in the price of instruments may occur as a result of interest rates, type of changes and other indexes.

Among market risk measurements derivative instruments are also taken into account, which are defined as financial operations the entity may make to purchase or sell asset in the future, such as foreign currency or securities, or financial futures over exchange rates, interest rates, or stock exchange indexes. The most common examples of derivatives are the fixed term contracts or "forwards", the options, futures and swaps, or financial barters. All of them are operations with compliance in the future.

## **Finance Superintendence Standard Model**

Standard methodology comprises tour (4) modules, which are separately calculated; such models are the following:

- Interest rate Risk
- Exchange Rate Risk
- Stock Price risk
- Collective Portfolio Investment Risk

To obtain total exposure to market risk, the results of these modules shall be arithmetically aggregated.

For interest rate and stocks modules, only the treasury book is taken into account. For exchange rate module, bank book positions are also included.

#### 1. Interest Rate Risk Measurement:

Exposure to interest rate risk reflects the risk associated to adverse movements in the market interest rate. Such exposure shall be measured by the entities in a separate manner for positions in Legal Tender, in foreign currency, and in Real Value Units (UVR). The methodology is as follows:

- Calculation of modified length
- Calculation of Sensitivities versus interest rate changes
- Adjustments between bands and zones
- Calculation of interest rate risk for each stair of bands
- Total exposure determination

#### 2. Measuring exchange rate risk:

By this methodology, capital minimum requirement necessary to cover the risks associated to take or maintain positions in foreign currency is calculated, both in the treasury book and in the bank book; In order to calculate exchange rate risk exposure, the controlled entities need to calculate net sensitivity in each currency as the product of net position and the corresponding sensitivity factor.

## 3. Measuring stock price risk:

Since the objective of positions held in stocks is not the benefit in the short-run of price fluctuations, such positions are not considered as belonging to the book of treasury, and therefore, they are not taken into account to calculate the Value in the Risk.

#### 4. Measuring Collective Portfolio Risk:

For investments in collective portfolios, the exposure to market risk is calculated as the product between risk factor applicable to such fund and the invested position in the factor. The factor of risk applicable corresponds to 14.7%, equivalent to the charge associated to the most risky positions included in the Standard model (stocks).

In order to calculate total exposure to market risk, you must add the exposures obtained for each module of the Standard methodology. The value obtained is computed to calculate Solvency Ratio.

## Calculation of Risk Value - Internal Model

Calculation of Risk Value of the different portfolios is made using Risk Metrics methodology published by J.P Morgan, the objective of which is to forecast maximum loss level a portfolio may suffer with 95% confidence level. To calculate daily volatilities, EWME model is used allowing for giving a higher weight to the most recent information.

#### **Valuation at Market Prices**

Banco de Occidente, according to standards set forth by Colombia Finance Superintendence performs an evaluation on a daily basis of total fixed and variable income investments and derivatives; the same procedure applies in the record and causation of interbank operations and repos, applying, for such purposes, the procedure and methodology set forth by the said entity in the Accounting and Financial Circular Letter 100 of November 1995 as amended and currently in force; for such valuation process the Bank uses the applicative acquired from a Software specialized company..

# **Structure to Manage Treasury Risk**

In compliance with the provisions in Internal Circular Letter 088 of December 29, 2000 from Colombia Finance Superintendence, Banco de Occidente organized the Structure of Treasury in three organizational and independent areas, to complete trading activities (Front Office); risk monitoring, control and management (Middle Office) and processing and accounting (Back Office).

Results of Liquidity Risks Closing: December 30, 2010

## **Liquidity Risk Management System**

Banco de Occidente as of December 31, 2010 submitted a LRI at 7 days of \$2.254.606 which allows for determining that there is no any significant value in risk of liquidity. Net fixed assets added up \$2.285.319 versus \$30.713 positive Net Requirement of Liquidity.

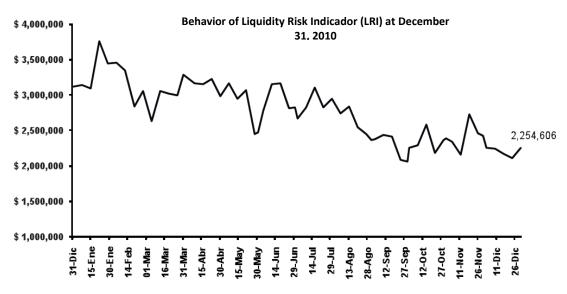

LRI Behavior as of December 31, 2010 (Col\$ Thousand)

# Result of Market Risk Closing 31, 2010

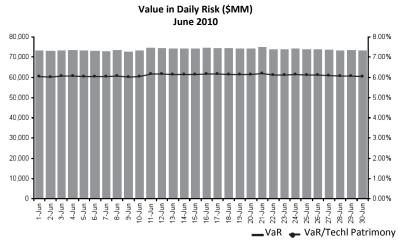

At the closing operacional period December 31, 2010 risk value of Banco de Occidente, calculated by using a new methodology provided in the Circular Letter 051, 2007 (Risk Value standardized in blocks of risks, as suggested by Basle Committee) \$66.757,8 result was obtained. The Figure below shows the recent evolution of Risk Value:

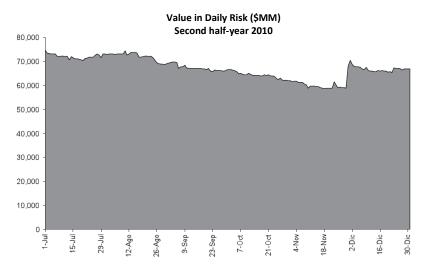

Risk Value per Modules

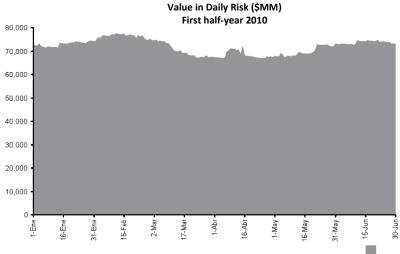

| Total Risk Value | \$<br>66.757,8 | 74.171,0   |
|------------------|----------------|------------|
| Exchange Rate    | 2.440,0        | 1.100,0    |
| Interest Rate    | \$<br>64.317,8 | 73.071,0   |
|                  | Dec. 31-10     | Jun. 30-10 |

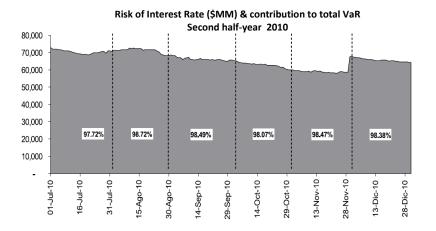

Below the results of value in regulatory risk daily transmitted:

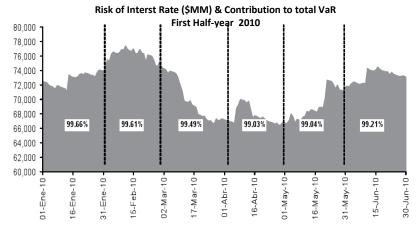

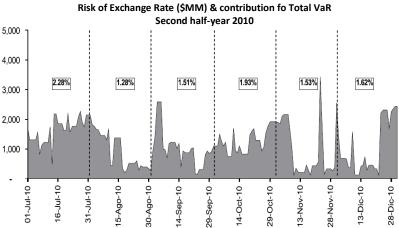

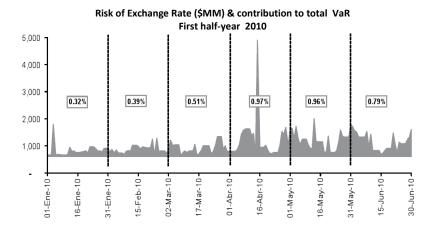

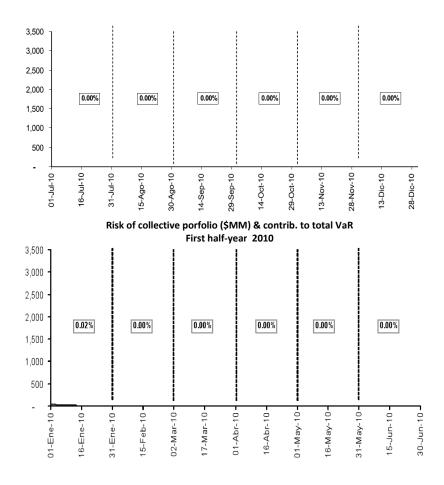

Risk of Collective Portfolio (\$MM) & contrib. to total I VaR Second half-year 2010

## **Solvency Ratio**

Calculation of solvency ratio corresponding to the closing periods December 31 and June 30, 2010, is s follows:

|                                  | Dec. 31-10       | Jun. 30-10 |
|----------------------------------|------------------|------------|
| Total VeR (*)                    | \$<br>66.758     | 74,172     |
| Technical Patrimony (*)          | \$<br>1.530.556  | 1,427,190  |
| Assets Weighed by Risk Level (*) | \$<br>13.832.990 | 12,683,252 |
| Solvency Ratio                   | 11.06%           | 11.25%     |
| Solvency Ratio (VeR 100%)        | 10.50%           | 10.57%     |
| VeR / P TECN. (Legal Required)   | 4.36%            | 5.20%      |

At the closing operational period December 2010, the value under market risk represents 4.36% of Technical Patrimony, compatible to Bank asset and liabilities structure and to investment and risk policies established, as well as to the use of capital and historical behavior of those risks.

## **Operational Risk**

According to the definition given by Colombia Finance Superintendence, Operacional Risk is understood as the possibility to incur in loss due to deficiencies, failures or inadequacies of human resource, processes, technology, infrastructure or otherwise, due to the occurrence of external events. This definition includes the legal risk, custody risk, and reputational risks associated to such factors.

For the purposes to carry out a proper Operational Risk Management, and complying with the External Circular Letter 041 / 2007 from Finance Superintendence and its precedent "Directives Related to the Adoption of an

Operative Risk Management System (ORMS)" during the second half-year 2010 the Bank pursued performing operative risk management through the monitoring, self-management, consolidations of risks, and the record of events. The foregoing includes as well updating of risk matrices and controls as the new risks, failures and/or controls are incorporated in accordance with system dynamics.

In order to manage, in an integral manner, information of processes, risks, controls, risk indicators, status of progress of action plans, inter alia, the Bank carried out the implementation of ORM— Operational Risk Manager, technological tool to facilitate OEMS proper operation.

#### **Business Risk Continuity**

As a part of Operative Risk Management and according to the definition given by Colombia Finance Superintendence Business Risk Continuity makes reference to the detailed group of actions described in the procedures, systems and resources necessary to resume and pursue the operation in the event of any interruption.

During the second half-year 2010 the Business continuity management was pursued through the maintenance schemes, such as updating of Impact Analysis on Business, Emergency Plan, continuity director, recovery plans, tracking critical third parties and training on virtual tool.

Vía owner of critical process, strategies tests of continuity were made, for instance, integral test of Reconciliation Units and Consolidation of Bogotá, Cali, Medellín, and Barranquilla cities, tests of periodical connectivity and tests of technology – Alternate Computing Center.

## Risk of Asset Laundry and Financing of Terrorism

The legal framework for Laundry Asset Control and Prevention, is essentially based on policies, regulations and procedures included in the Circular Letter 026 of June 27/2008 contained in the Title I, Chapter 11, of Circular Letter 007 / 1996 issued by Colombia Finance Superintendence, as well as the provisions in the Financial System Organic Statute, 40 recommendations of GAFI, 9 recommendations of GAFISUD, and Colombia Legal provisions.

For such purposes, the Bank has been properly implementing the Laundry Asset and Financing of Terrorism Risk Management System LAFTRMS, based on COSO ERM methodology.

On the other hand, is should be stressed that the Bank counts on the resolute commitment of all its employees and directives, fully complies with the opportune remittance of the different reports and information to all controlling bodies, counts on an Official of Compliance properly trained who, in turn, leads an adequate structure of compliance duly trained on Risk Management with emphasis on the prevention of Laundry Asset and Financing of Terrorism, uses an advanced transactional monitoring system which is duly segmented and profiled and related to the analysis of quantitative and qualitative variables making this system a robust and reliable tool, and in the same way the bank acquired an specialized software to manage MSDTRMS, includes a functional and interactive training program about Laundry Asset and Financing of Terrorism prevention addressed to all Bank employees, allowing for doing the evaluation of the knowledge acquired according to the international standards. Similarly, the Bank implemented a well-known methodology to qualify the different risk factors and the associated risk focused to Laundry Asset and Financing of Terrorism Prevention and control.

In this connection LAFTRMS developer by Banco de Occidente contains the appropriate controls allowing for mitigating both laundry asset and financing of terrorism risk, as well as the legal, reputational, operacional and contagion risk implementing the due control, monitoring and opportune report, and this way meeting the specific expectations of controlling authorities as well as the expectations of overseas correspondent banks.

## (31) Corporate Government

In regards with corporate government concept, the Board of Directors of the Bank, consulting and integrating the legal, regulatory and statutory directives, as well as internal policies and the best practice of government, the Bank established and issued a code of corporate government..

#### **Board of Directors and Top Management**

The Bank is aware of the responsibility inherent to the management of the bank business risks, knows that they are consistent with the entity's general strategy and are informed about the processes, business structure and the nature of activities.

It is a policy of the Board of Directors and the Top Management to assist with guidance and follow up Bank's business, by issuing the instructions and guidelines to grant the credits, determining the policies and limits of action by type of market, product or business unit; defining the profile of risk of the entity and adopting the actions necessary to face with the new financial risks; establishing the organizational structure required and assessing the risk methodologies.

The Board of Directors is responsible for the approval of methodology, procedures and limits to grant the credit facilities. There exists a protocol of report addressed to this business unit in order to keep the appropriate instance properly informed about credit risk management.

Additionally, the Board of Directors urges the compliance with the policies of internal control through its Audit Committee, with a view to reduce operational risks.

#### Reports to the Board of Directors and to the Top Management

The Board of Directors and the Top Management of the Bank, have available clear, accurate, and opportune information means allowing for implementing permanent control over the several different risks inherent to bank business with the exposures per type of risk, per area of negotiation and per portfolio.

Such reports allow for doing a regular follow up of business, profitability and management indicators.

The Code of Corporate Governance defines the issues related to the establishment and supervision of control policies of the entity, the objectives, goals, mechanisms and responsibilities of the different administrative bodies, as well as the reports to the Board of Directors and the Audit Committee empowered by the Board.

In the same way, establishes the responsibilities, limits, and aspects about management, supervision and control of risks in completion of the several different Bank's business and activities, under the limits of exposure, covering counterpart's or credit risks, Liquidity Risk, Interest Rate Risks, Exchange Rate Risk, Derivatives Risks, and Operacional Risks.

#### **Technology Infrastructure**

The Bank has been outitted with systems and Technologies rendering its activity and operations more controllable. The streamline technology process has not been only about traditional software of registry and accounting; it has implied as well updating of security and communication systems.

On he other hand, the Control and Risk Management Areas count on technologic structure to offer information, assess production process and the results obtained, both per operation and at portfolio level.

The Bank counts on several different information systems documented to support all activities, in addition to applicatives equipped with database to satisfy control requirements. Most of these applicatives are open systems

allowing for unloading information to electronic sheets so to support measurement, follow-up and risk control activity.

The Bank makes technological developments on a permanent basis in order to verify and increase operacional control and reduce associated risks.

#### **Risk Measurement Model**

To identify, measure, and monitor the different types of risks, the Bank holds specific technologies and information and measurement systems allowing for qualifying and quantifying business risks according to the standards prevailing; Credit, Market, Liquidity, Operative.

In the specific area of measurement of Market Risk and Liquidity Risk the Bank adopted Finance Superintendence standard methodologies .

#### **Organizational Structure**

The Bank has in place an Organizational Structure headed by Risk and Collection Vice President, allowing for promoting analysis, integration and management of risks inherent to the several different business and activities.

Credit risk management of credit operations, as well as operative and business continuity risks is made in the Division of Credit and Operative Risk, while market risk management in Treasury operation and Liquidity Risk is accomplished by Treasury Risk Division.

In the same way, concerning operation and business continuity risk, the Bank has commenced a quantification work.

The Bank has available the Division of Control and Compliance Unit specifically for juridical risk linked to laundry asset.

In the same way, Legal Vice Presidency manages the other legal risks.

Authority and responsibility levels in risk management are identified and recognized by the employees of every area, who have available an accurate description of functions, objectives and scope of their positions.

#### **Human Resources**

Bank's Personnel Selection Area has established some criteria related to minimal educational and experience levels required according to the profile of every position.

People involved in risk analysis, measurement and management, hold professional training and skills necessary to discharge their duties in a competent manner.

Specifically it is intended to combine a demanding professional training in financial area and a recognized honesty and human quality.

To maintain employees' technical competence, internal and external training programs are made about the topics required for risk management, as well as participation in several different forums and interaction with regulatory and controlling entities.

## **Verification of Operations**

Technological Systems, processes involved, evaluation tools and mechanism established throughout the different negotiations allow for evidencing operations to be made according to the conditions agreed upon. Such systems render more agile and transparent risk management and control.

At present, there are in place several security mechanisms such as telephone call recording, security cameras located in strategic points, electronic control of physical access to the units, contingency plans and assistance in the event of systems failures or interruptions, restricted access areas; control of access to systems, as well as procedures established for the closing operations allowing for verifying timely and properly accounting of operations.

Specifically in the table of Treasury there are in place recording devices allowing for verifying transaction made by the operators, such recordings properly maintained and during the time indicated in the legal standards.. Additionally, the Code of Conduct, containing the guidelines, policies, parameters, duties and obligations to be complied by all employees; prohibition of use of cell-telephone in negotiation room. In the same way, the Bank counts on a signal blocking mechanisms of those communication devices.

#### **Audit**

Bank's Auditing allocated the human resource necessary to review and evaluate those aspects related to risk management and administration. Internal Control system operating in the Bank allows for Auditing to keep informed in detail about the operations made and implement the follow-up to the opportune and proper accounting activities according to the chronograms and defined working plans.

The major auditing duties is the periodical and systematic operations revision; analysis and verification of compliance with internal control; generation of report including enhancement recommendations and follow up and advisory about the actions implemented.

Bank controlling units validate on a permanent basis all activities, transactions and operations of the Bank; such validation is made within the parameters allowed by the regulations prevailing and authorized by the Board of Directors and the Top Management.

#### (32) Legal Controls

As of December 31 and June 30, 2010, the Bank has complied with the cash provisions requirements, own position, minimum capital, mandatory solvency and investment ratio

#### (33) Contingencies
